

IMPORTANT NOTICE - NO BRAKES

Solá Equipment Street Frames **DO NOT** have brakes installed and are **NOT RECOMMENDED** for beginners. The user of this product must have advanced skating skills which enable the user to slow down and stop without the aid of an inline skate brake. This product is intended for experts and requires the skills described above. You should only use the Street Frames once you are skilled enough on skates to safely perform advanced maneuvers in a skatepark or on the street, as they are intended for - this includes controlling your speed without the use of a brake.

WARNING - SKATE AT YOUR OWN RISK

Inline skating involves inherent risks that cannot be eliminated without jeopardizing its essential qualities. This includes the risk of serious bodily injury or even death. Please skate responsibly. To reduce your risk of harm, we recommend you always use protective gear while using Solá Equipment Street Frames - including a helmet, knee pads, wrist guards and elbow pads.

ASSUMPTION OF RISK AND RELEASE OF LIABILITY

By purchasing and using Solá Equipment Street Frames and/or Solá Equipment products, you fully recognize the dangers and hazards inherent in skating and using the Street Frames, as well as the unknown dangers and hazards which may arise while using the Street Frames.

The seller, distributor and manufacturer of this product assume no responsibility for damages or injury which may arise in the use of this product, whatever the cause, including accidents or negligence.

Understanding this, you **DO VOLUNTARILY, EXPRESSLY AND COMPLETELY RELEASE AND HOLD HARMLESS** Solá Equipment and its owners from any and all claims and liabilities which are in any way connected with your use of Solá Equipment Street Frames or Solá Equipment products.

BEFORE USE

Inspect the Street Frames before you use them for the first time and read the included **ASSEMBLY INSTRUCTIONS** to fully understand what's in the box, and how to assemble onto your skates. We recommend you check the bolts, axels and wheels of your skates each time you use them to ensure that they are properly affixed and you are ready to skate.

Solá

THANK YOU.

Solá Equipment is built on the principle of on-going improvement through continuous use, experimentation and communication.

Founded in 2018 by Kyle Solá, Solá Equipment focuses on the research, design, development and manufacturing of advanced and considered products that elevate athletic and creative potential.

Please know our sincere gratitude for your purchase and support of the Solá Equipment Street Frames, this would not have been possible without your trust, interest and support.

BOX CONTENTS

2 X Frames
 2 X Flat-rocker H-Block Inserts
 12 X Axels (ten axels need, two are to be kept as spare)
 1 X m4 hex key

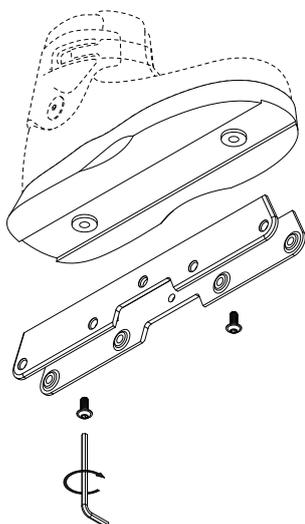

ASSEMBLY INSTRUCTIONS

01
 Affix frames to boots or soleplates with your boot-specific hardware. Included in the package is a simple M4 hex key.
 *Boot-mounting hardware is not included as this is boot-specific.

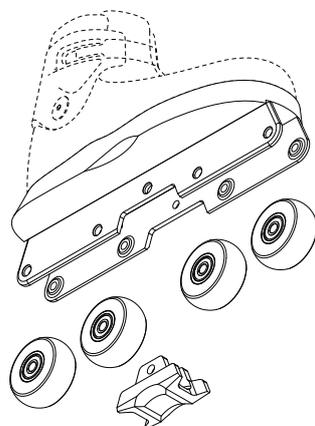

02
 Position wheels (with bearings and spacers) and H-Blocks in frame body, place axels through all holes from the beveled receiving side.
 **Axels are directional and can be positioned on either side of the foot. By placing the tool-side on the inside of the foot, the frames will be easier to service while wearing, and preserve the heads of the screws for longer.

03
 Tighten all wheel axels before tightening h-block into place. Do not exert excessive force, as this can damage axel threads or frame walls.
